

Battle in the Sky

Kedus Sineshaw

Kse8144

After hitting the space bar, the orb in the sky will fly towards the stickman on the right.

The User can control the roughness of the terrain, but after generating a new terrain, the seed changes because it is random. By clicking v, the user can change from a camera driving on the terrain to a free-fly camera.

Project2starter.js - Has JS code for project

Project2starter.html - Has html code for project

Lib - includes necessary js files for code

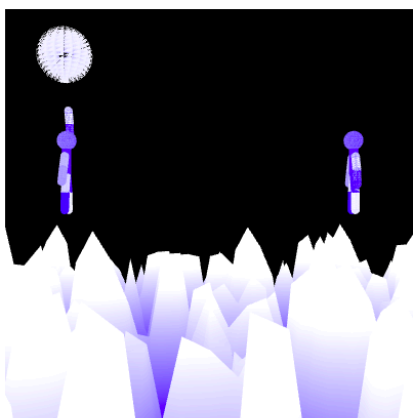

Resources - Includes obj and ico files for project

Terrain.js - Has code for terrain generation

Use **W/S** to move forwards/backwards, **Q/E** to rotate up/down, and **A/D** to rotate left/right.

Space to attack.

Enable Driving Mode with **V**.

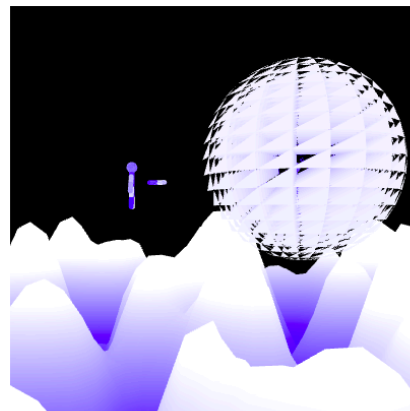

Use **W/S** to move forwards/backwards, **Q/E** to rotate up/down, and **A/D** to rotate left/right.

Space to attack.

Enable Driving Mode with **V**.

Roughness: 20

Use **W/S** to move forwards/backwards, **Q/E** to rotate up/down, and **A/D** to rotate left/right.

Space to attack.

Enable Driving Mode with **V**.
